## 10 Technical Data

|  | BLS3000 |
| :---: | :---: |
| Measuring element | Reed switch |
| Measuring ranges | L0 = max. 1000 mm , LM: see name plate |
| Display | 4-digit 14-segment LED display, red, digit height 9 mm |
| Transistor switching outputs PNP | 1 or $2 \times \mathrm{NO} / \mathrm{NC}$ function (programmable), adjustable switching time delay $0 . . .50 \mathrm{~s}$ |
| Resolution | 5 mm |
| Ambient temperature range | $-20 \ldots+70^{\circ} \mathrm{C} /-4 \ldots+158^{\circ} \mathrm{F}$ |
| Media temperature range | $-25 \ldots+80^{\circ} \mathrm{C} /-13 \ldots+176{ }^{\circ} \mathrm{F}$ |
| Storage temperature range | $-30 \ldots+80^{\circ} \mathrm{C} /-22 \ldots+176{ }^{\circ} \mathrm{F}$ |
| Process connection |  1" NPT M, 114" NPT M |
| Protection system ${ }^{2 /}$ / class | IP65, IP67; UL-Type 1,4X,6 / III |
| Electrical connection | Plug M12x1 mm, 4/5/8-pin (depending on output code), |
| Power supply | 15... 32 V DC /relay-output: 20-32 V DC |
| Approvals | cULus ${ }^{1 /}$ |
| For further technical data and options please refer to the data sheets |  |

For further technical data and options please refer to the data sheets

1) Conditions of use: $60^{\circ} \mathrm{C}$ max. ambient, power supply max. 28 V DC
2) Conditions of use: $60^{\circ} \mathrm{C}$ max. ambient, power supply max. 28 V DC
3) The stated ingress protection only applies when plugged in using mating connectors that have the appropriate ingress protection

## Barksdale <br> CONTROL PRODUCTS

## 1 Intended Applications

The dual level switch monitors the level of the medium into which the probe is immersed. The dual level switch features up to two switching outputs and one analog output.

## ! <br> DANGER <br> The switch may only be used in the specified fields of application.

The temperatures must be within the specified ranges, the pressure values and the electrical rating must not exceed the values specified.
Observe also the applicable national safety instructions for assembly, commissioning and operation of the switch
The switch is not designed to be used as the only safety relevant element in pressurized systems according to PED/DGR 97/23/EC.

## 2 Safety Instructions

The safety instructions are intended to protect the user from dangerous situations and/or material damage.
In the operating instructions the seriousness of the potential risk is designated by the following signal words:

## 4 DANGER

Refers to imminent danger to men.
Nonobservance may result in fatal injuries

## WARNING

Refers to a recognizable danger.
Nonobservance may result in fatal injuries, and destroy the equipment or plant parts

## 1. CAUTION

Refers to a danger
Nonobservance may result in light injuries and material damage to the switch and/or to the plant

## [. 6 <br> IMPORTANT

Refers to important information essential to the user

## Disposal

The switch must be disposed of correctly in accordance with the local regulations for electric/electronic equipment

The switch must not be disposed of with the household trash

## 3 Standard

The standards applied during development, manufacture and configuration are listed in the CE conformity and manufacturer's declaration

## 4 Warranty/Guarantee

Our scope of delivery and services is governed by the legal warranties and warranty periods.
Terms of guarantee
We guaranty for function and material of the dual level switch under normal operating and maintenance conditions in accordance with the statutory provisions

## Loss of guarantee

## The agreed guarantee period will expire in case of

- incorrect use,
- incorrect installation or
- incorrect handling or operation contrary to the provisions of these operating instructions

No liability is assumed for any damage resulting therefrom, or any consequential damage Refer to Barksdale "Standard Terms and Conditions".
5 Installation

## CAUTION

Avoid impact and severe vibration during transport. Even if the switch housing remains undamaged internal parts may be damaged and cause malfunctions

The level switch may only be installed and electrically connected by trained and instructed staff according to state-of-the-art standards.

| DANGER |
| :--- | :--- |
| The switch may only be installed in systems in which the maximum temperature $\mathrm{T}_{\max }$ and the |
| maximum pressure $\mathrm{D}_{\text {max }}$ ( 3 bar) are not exceeded. |
| Only install the switch when deenergized (electrically and hydraulically/pneumatically). |

Mount the level switch from the bottom to the fitting using a wrench size 27 mm ( 1.063 inch), and tighten it to a maximum torque of 22 Nm ( $190 \mathrm{in} / \mathrm{lb}$ ).
The housing temperature of the level switch measured on the hexagon head of the proces connection must not exceed $70^{\circ} \mathrm{C}\left(158^{\circ} \mathrm{F}\right)$ when operated continuously at the maximum ambient temperature. This must be ensured by special provisions.
Adjustment of the orientation of the display and/or the process connection must be done by hand. Do not use tools!

## Barksdale

The mounting situation (immersion depth, probe length, operating conditions) largely determines the measuring accuracy of the level switch to be achieved.

## $\triangle$ caution

The following notes must absolutely be observed

- The permissible data (see type label) must be kept.
- The level switch must be protected against magnetic fields.
- The sliding tube of the level switch must not be bent and severe shocks must be avoided, to avoid damage to internal reed contact.
- Existing adjusting rings, gripping rings or clamping brackets must not be displaced since otherwise the SPST or SPDT function is no longer guaranteed.

Electrical connection is to be carried out dependent on the type of switch (see type label) according to the chart below. Wrong assignment of the connections may cause malfunctions or incorrect switch outputs.

## Electrical connection

| Plug M 12x1 4/5/8-pin | Model with 2 switch point | Model with 1 switch point and 1 analog output | Model with 2 switch point and 1 analog output | Model with 2 switch point (relay-contacts) |  |

Plug

6 Commissioning/Operation
The level switch may only be commissioned and operated by authorized staff.

## CAUTION

Do not put the switch into operation when the switch itself or the connection cable is damaged.

## WARNING

Be aware of the fact that in case of operation with higher temperatures the casing surface may become very warm

A self-test is performed on first switch on. If the software recognizes an error during the self-test or during operation, this is signalled in the display by "Err" and the corresponding message, refer to Error list on page 7. The red LEDs S1 and S2 signal the activity of the two switching points
Operation of the level switch is menu-driven via three membrane keys $\triangle, \nabla$ and M

| $\boxed{ }$ CAUTION | Cle |
| :--- | :--- |
| The keys may be damaged by pointed, hard objects. Do not use any pointed, hard objects for <br> making entries. |  |

For information about the factory settings for the parameters and how to change them please refer to the next chapter 7 "Programming".

## 7 Programming

| Navigation function | Symbol (membrane key) |
| :--- | :--- |
| Menu descending |  |
| Menu ascending | M |
| Horizontal movement in menu, select menu item | - |
| Parameter change ascending |  |
| Parameter change descending | M |
| Accept parameter change and return to current menu item | Press |
| Return to measured value display | simultaneously |

7．1 Parameters

| Parameter | 14－segment display | Description |
| :---: | :---: | :---: |
| SP1／SP2＊ |  | Hysteresis function：switching point of solid state contact |
| FH1／FH2＊ | FH，Frab | Window function：window High solid state contact |
| rP1／rP2＊ | （8） | Hysteresis function：hysteresis of solid state contact |
| FL1／FL2＊ |  | Window function：window Low solid state contact |
| EF | Er | Extended programming functions |
| rES | －65 | Reset parameters to factory settings |
| dS1／dS2＊ | －6， | Switching time delay－the set contact rating must be permanently exceeded to trigger a switching function |
| dr1／dr2＊ | 日rs，mra | Switching time delay－the contact rating must be permanently lower than the set contact rating to trigger a switching function |
| Ou1／Ou2＊ | 㫛閏， | Switching function of solid state contact <br> HNO＝hysteresis function，NO contact <br> HNC＝hysteresis function，NC contact <br> FNO＝window function，NO contact <br> FNC＝window function，NC contact <br> diA $=$ diagnostic function， NO contact（only Ou2） |
| uni＊＊＊ | －15 | Select unit：\％，mm，cm，m，in，ft，I，Ga，m ${ }^{3}$ <br> If the measuring range is outside the display range，unit selection is not allowed．The parameter＂uni＂is not displayed． |
| dEcP＊＊＊ | －60r | Decimal point display： $0.000 ; 00,00 ; 000,0$ oder 0000 |
| dLFS＊＊＊ | －505 | Display，bottom float stopper：0．．． 9999 |
| duFS＊＊＊ | HRIG | Display，top float stopper：0．．． 9999 |
| OuA＊＊ | 盛曻 | Analog output $\begin{array}{ll} \mathrm{I} & =4 \ldots 20 \mathrm{~mA} \\ \mathrm{U} & =0 \ldots 10 \mathrm{~V} \\ \text { I.INV } & =20 \ldots 4 \mathrm{~mA} \\ \text { U.INV } & =10 \ldots \mathrm{~V} \end{array}$ |

| Parameter | 14－segment display | Description |
| :--- | :--- | :--- |
| ASP＊＊ | Analog start value |  |
| AEP $^{* *}$ | Analog end value |  |
| dPA＊$^{*}$ | Damping of analog output |  |
| ErS．A＊＊ | Error signal of analog output <br> values：$<3.6$ or $>22$ or Off |  |
| Hi | Saved value of highest level measured |  |
| Lo | Saved value of lowest level measured |  |
| COF | Offset correction（max． $10 \%$ of measuring range） |  |
| ddis | Damping display |  |
| Fdis | Rotate display through $180^{\circ}$ |  |
| Firm |  | Unit indication |
| Lock |  | Firmware version |

＊only models with 2nd switching contact
＊＊only models with analog output
＊＊＊no automatic conversion
If the unit and／or the display of the measured values are changed all parameters for switching points or analog output must be checked and adjusted as required．

Error list

| Parameter | 14－segment display | Description |
| :--- | :--- | :--- |
| sens |  | Sensor defect |
| SC1 | Short circuit，solid state contact 1 |  |
| SC2 |  | Short circuit，solid state contact 2 |
| AOut | Open output，short circuit |  |
| OL | Sensor limit positive |  |
| UL | Sensor limit negative |  |
| KEY |  | Internal defect |
