## Barksdale <br> CONTROL PRODUCTS

ATEX Type Certification marking for type L1X-EX, T1X-EX, T2X-EX
Type of protection "d" explosion-proof enclosure

| Approval: | (Ex) <br> II 2 G D <br> Ex d IIC T6 <br> ExtD A21 IP65 T80 ${ }^{\circ} \mathrm{C}$ <br> $-40^{\circ} \mathrm{C} \leq \mathrm{Tamb} \leq+75^{\circ} \mathrm{C}$ |
| :---: | :---: |
| Certificate no.: | ISSEP08ATE024X |
| Standards applied: | IEC 60079-0, IEC60079-1, IEC 61241-0 and IEC 61241-1 |

L1X, T1X, T2X Models are UL (File No. E58658, Guide No. XBDV) \& CSA (File No. LR34556, Guide 400-E, Class 4868) are Listed as Temperature Indicating and Regulating Equipment for use in Hazardous Locations, as follows;
Class I, Groups B (UL Only), C \& D, Class II, Groups E, F \& G, Class III.

ML1H, MT1H, L2H, T2H Models are UL (File No. E56247) \& CSA (File No. LR34555, Guide $400-\mathrm{E}-\mathrm{O}$, Class 4813) are Listed as Temperature Indicating and Regulating Equipment for use in Ordinary Locations.

## Operating life time

The switches are designed for an operating life time of at least 1 million cycles when used under normal design criteria.

## Operating Instructions Mechanical Temperature Switches ML1H,MT1H,L2H,T2H,L1X/L1X-EX,T1X/T1X-EX,T2X/T2X-EX

## Barksdale <br> CONTROL PRODUCTS

Barksdale, Inc.
3211 Fruitland, Ave
Los Angeles, CA 90058

| Phone: | 800 835-1060 |
| :--- | :--- |
| Fax: | $323589-3463$ |
| email: | sales@barksdale.com |
| Internet: | www.barksdale.com |

Bulletin No. 272182-E
Date: 07-20-2009

Specifications are subject to changes without notice!

## Intended Applications

The temperature switches are specifically applied for monitoring and controlling of operations using maximum or minimum temperatures. A micro switch triggers an electrical signal when minimum or maximum temperatures are reached.

## 4. DANGER <br> The switch may only be used in the specified fields of application (see type label) <br> The temperature has to be within the specified ranges, the pressure values and the electrical rating must not exceed the values specified. <br> Observe also the applicable national safety instructions for assembly, commissioning and operation of the switch <br> The switch is not designed to be used as the only safety relevant element in pressurized systems according to DGR 97/23/EC.

## Safety Instructions

The safety instructions are intended to protect the user from dangerous situations and/or material damage.
In the operating instructions the seriousness of the potential risk is designated by the following signal words:

|  | DANGER |
| :--- | :--- |
| Refers to imminent danger to men. |  |
| Non-observance may result in fatal injuries. |  |

## ! $\quad$ WARNING

Refers to a recognizable danger
Non-observance may result in fatal injuries, and destroy the equipment or plant parts.

## ! CAUTION

Refers to a danger.
Non-observance may result in light injuries and material damage to the equipment and/or to the plant.

Local mount temperature switches
Measuring Ranges

Disposal
The equipment must be disposed of correctly in accordance with the local regulations for electric/electronic equipment.
The equipment must not be disposed of with the household garbage!

## Standards

The standards applied during development, manufacture and configuration are listed in the CE conformity and manufacturer's declaration.

## Warranty/Guaranty

## Warranty

Our scope of delivery and services is governed by the legal warranties and warranty periods.

## Terms of guaranty

We guaranty for function and material of the single / dual temperature switch under norma operating and maintenance conditions in accordance with the statutory provisions.

## Loss of guaranty

The agreed guaranty period will expire in case of:
changes or modifications to the housing/switch/fitting
incorrect use,
incorrect installation or
incorrect handling or operation contrary to the provisions of these operating instructions.
No liability is assumed for any damage resulting therefrom, or any consequential damage.

## Transport/Storage

## ! CAUTION

Severe shock and vibrations should be avoided during transport. Storage should be dry and clean.

## Installation/Commissioning

## DANGER

Only install or uninstall the switch when de-energized (electrically and hydraulically/pneumatically).
Process connection and electrical connection must be carried out by trained or instructed personnel according to state-of-the-art standards.
The switch must only be installed in systems where the maximum temperature $T_{\max }$ is not exceeded (see type label).

## 4. WARNING

Be aware of the fact that in case of operation with higher temperatures the casing surface may become very hot

Ambient temperature range: $-40 \ldots+75^{\circ} \mathrm{C}$; max. pressure at sensor: 21 bar

## WARNING

In case the temperature falls below or exceeds the permissible temperature limits specified for the sensor and the permissible ambient temperature, the function of the temperature switch can no longer be guaranteed and the temperature switch may be damaged.

Check the operation of the switch regularly. If the switch does not work properly, stop operation mmediately

## CAUTION

All standard temperature switches are supplied with conduit threads which must be sealed with pipe sealant or Teflon tape to prevent moisture entry. The explosion-proof switches have threaded plugs covering the electrical connection entry.
Threaded plugs must be removed to install the approved electrical connection of your choice. The capillary system must be installed with care avoiding sharp bends.
Provide protection against damage where needed.

## 1am IMPORTANT

The temperature sensing element can be used up to 21 bar. In case of pressures higher than 21 bar the temperature sensing element must be provided with a thermowell suitable for the respective application.
All temperature switches are tested for proper functioning before they leave the factory.

| Micro switch | Special Characteristics | Volt AC <br> $50 / 60 \mathrm{~Hz}$ | Ind. <br> Load <br> A | Res. <br> Load <br> A | Volt DC | Ind. <br> Load <br> A | Res. <br> Load <br> A | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| H | Micro switch with silver contacts | $\begin{aligned} & 125 \\ & 250 \\ & 480 \end{aligned}$ | $\begin{array}{r} 10 \\ 10 \\ 3 \end{array}$ | $\begin{array}{r} 10 \\ 10 \\ 3 \end{array}$ | $\begin{array}{r} 6 \\ \text { to } \\ 24 \end{array}$ | 0.50 | 0.5 | Small hysteresis; high AC / low DC loads |
| M | Micro switch with silver contacts | $\begin{aligned} & 125 \\ & 250 \\ & 480 \end{aligned}$ | $\begin{array}{r} 10 \\ 10 \\ 3 \end{array}$ | $\begin{array}{r} 10 \\ 10 \\ 3 \end{array}$ | $\begin{array}{r} 12 \\ 24 \\ 250 \end{array}$ | $\begin{aligned} & 5.00 \\ & 1.00 \\ & 0.25 \end{aligned}$ | $\begin{array}{r} 15.0 \\ 2.0 \\ 0.4 \end{array}$ | Medium hysteresis; high AC and DC loads |
| GH | Micro switch with gold plated contacts for low voltage and low current | 125 | 1 | 1 | 24 | 1.00 | 1.00 | Small hysteresis |
| S | Micro switch with silver contacts | $\begin{aligned} & 125 \\ & 250 \\ & 480 \end{aligned}$ | $\begin{aligned} & 15 \\ & 15 \\ & 15 \end{aligned}$ | $\begin{aligned} & 15 \\ & 15 \\ & 15 \end{aligned}$ | $\begin{array}{r} 12 \\ 24 \\ 250 \end{array}$ | $\begin{gathered} 10.00 \\ 5.00 \\ 0.03 \end{gathered}$ | $\begin{array}{r} 15.0 \\ 6.0 \\ 0.2 \end{array}$ | Adjustable hysteresis |
| J | Micro switch sealed - with silver contacts | $\begin{aligned} & 125 \\ & 250 \\ & 480 \end{aligned}$ | $\begin{array}{r} 10 \\ 10 \\ 3 \end{array}$ | $\begin{array}{r} 10 \\ 10 \\ 3 \end{array}$ | $\begin{array}{r} 6 \\ \text { to } \\ 24 \end{array}$ | 0.50 | 0.5 | Small hysteresis |
| G...RD | Micro switch with silver contacts | $\begin{aligned} & \hline 125 \\ & 250 \\ & 480 \end{aligned}$ | $\begin{aligned} & 10 \\ & 10 \\ & 10 \end{aligned}$ | $\begin{aligned} & 10 \\ & 10 \\ & 10 \end{aligned}$ | $\begin{array}{r} 12 \\ 24 \\ 250 \end{array}$ | $\begin{gathered} \hline 15.00 \\ 10.00 \\ 0.20 \end{gathered}$ | $\begin{array}{r} 15.0 \\ 15.0 \\ 0.3 \end{array}$ | Manual reset |

We recommend gold plated contacts for all applications with low voltage/power.

Fig. 11: Temperature switch type $\mathrm{L} 2 \mathrm{H}-\ldots$

## Set point adjustment

In temperature switches, the liquid expands in the sensing element (capillary) when the temperature changes. Due to the expansion the micro switch is actuated.

Upon delivery of the product, the set points are likely to be found in the middle of the adjustable range. On request, fix set points may be adjusted by our factory. In this event, the point will be indicated on the type plate or any separate plate, $i=$ increasing, $d=$ decreasing
The set point is adjusted by turning the adjustment knob. (Knob visual indication is for reference only).

| W0 | IMPORTANT |
| :---: | :---: |
| In some cases the corresponding housing cover must be removed in order to reach the adjustment knob. |  |
| Heat the temperature switch to the desired switching temperature. <br> Turn the adjustment knob to actuate the micro switch. (Knob visual indication is for reference only) |  |
| [40 | IMPORTANT |
| Pleas | nsult the wiring diagram for the contact status at state of rest (see Fig. 5). |

## Precise adjustment of set point to actuate on increasing temperature

Connect a control unit (lamp, buzzer, etc.) to (C) and (NO). When the unit is connected correctly and the sensor temperature is higher than the temperature adjusted on the scale, the buzzer or lamp is not activated.
Adjust the desired switch point with the help of the scale via the adjustment knob. (Knob visual indication is for reference only).
Watch the switch point while the temperature is rising (about $2^{\circ} \mathrm{C} /$ minute). The control unit is activated when the switch point is reached.
If necessary, re-adjust the set temperature by some degrees (by means of the scale the temperature can be adjusted with an accuracy of $3 . .5 \%$ of the scale value).

## Precise adjustment of set point to actuate on decreasing temperature

Connect a control unit (lamp, buzzer, etc.) to (C) and (NC). When the unit is connected correctly and the sensor temperature is higher than the temperature adjusted on the scale, the buzzer or lamp is activated.
Adjust the desired switch point with the help of the scale via the adjustment knob. (Knob visual indication is for reference only).
Increase the temperature (about $2^{\circ} \mathrm{C} /$ minute) until the control unit is deactivated
Watch the point at which the control unit is activated again while the temperature is falling. This is the set switch point.
If necessary, readjust the set temperature by some degrees (by means of the scale the temperature can be adjusted with an accuracy of $3 . .5 \%$ of the scale value).

## Barksdale

## Maintenance/Cleaning

## Maintenance

The pressure switch is maintenance free. Checking the set points lies within the discretion of the user. The usual preventive maintenance work in accordance with the PED and ATEX guidelines must always be carried out.

## Technical Data
